

## Overcoming Financial Growing Pains in Professional Services Organizations

### 5 PROVEN STRATEGIES

#### 1 Increase Productivity with Automation

TANDEM HR

“

With Sage Intacct, our finance team now has much more time to analyze data, as opposed to worrying about data entry and processing spreadsheets.

**SAM KASHY**  
Director of Business Development  
Tandem HR

**500**

person-hours saved annually

#### 2 Accelerate Global Consolidation

**19**

hours per month saved by streamlining global consolidation

One of the most powerful features of Sage Intacct is its global financial consolidations. We have three entities with three currencies. The consolidation process before Sage Intacct was a very, very painful process that took approximately 30-40 hours a month. Now, our consolidation process is as close to a one-button consolidation as you can get.

#### 3 Gain Visibility into Project Profitability

Cameo GLOBAL

“

As our leaders have learned Sage Intacct's powerful capabilities, they've started using more and more reports and are employing an increasingly data-driven approach for every business decision. Now everybody sees the same data, and we have much better information with which to collaborate and make decisions.

time saved per month

#### 4 Streamline Processes and Integrate IT Systems

**40**

hours of data entry cut each month through integration

We love Sage Intacct's ease-of-use, robust reporting capabilities, and its tight integration with Salesforce. It also offers flexible APIs to connect with other business systems and the ability to grow with us over time as we automate more and more processes.
